HARDY GIANT CULTIVATED BLUEBERRIES

Not only does the blueberry produce big juicy berries 2 to 3 times as large as common blueberries, but it is ornamental on the lawn or in the shrubbery border and very easy to grow. The foliage is dark green, long and narrow, blossoms bell-shaped and pinkish white. During the autumn the leaves turn bronze, and during the winter months the twigs are red. The bushes will grow to the height of 8 feet.

For the best results plant on acid soil. Low muck or sand soils are usually very acid. Plant two or more plants to insure proper pollinization. If your soil is not acidity, mix the soil with our SPECIAL IMPORTED PEAT MOSS, see page 11. Set the plant and fill the hole with the same mixture and keep the soil moist.

GIANT BLUEBERRIES

Just Think! Giant berries, many three-fourth of an inch across. Plump and juicy, sweet and full-flavored. Mild enough to be included in any diet. Fresh ripe berries require no sugar, canned berries very little. Ideal for freezing and very delicious for pies. Every bush is a heavy producer, four bushes in your yard will provide enough berries for pies throughout the season.

BARTLETT

There's hardly a person that doesn't know the Bartlett Pear and its qualities, as it is grown in, and adaptable to all different climates, soils and situations. Fruit is large, golden yellow in color with a reddish blush on the sunny side. Flesh is tender and juicy, with a delicious musky aroma. Trees are vigorous, attain large size, bear young, live long, and barring frosts or freezes, they bear full crops year after year. Justly the leading commercial Pear—a leader among canning Pears. Fruit ripens early September.

KIEFFER

One of the largest best known Pears. One of the best canning varieties and is possibly planted in more home orchards than any other variety. One of the easiest Pears to grow, less subject to blight than many varieties, strong grower, early and prolific bearer. Golden background, with a red blush. Recommended not only for the home orchard, but for the local market and roadside stands. Ripens in late October, heavy yielders.

NEW BOSC

A popular variety, and one of the best winter varieties. Fruit of artistic long-necked shape, golden russet color, with juicy, white flesh. Can be kept in storage for use during the holidays. Trees are rather small-growing, but heavy yielders. For Prices See Top of Page.

An early ripening Pear—about 10 days earlier than Bartlett. Attractive fruits are large and of uniform size, with beautiful green skin deeply blushed carmine-red. Flesh is white, crisp, sweet and juicy. A good shipper and good canning variety. Hardy, strong grower. For Prices See Top of Page.

CLAPP'S FAVORITE

An early ripening Pear—about 10 days earlier than Bartlett. Attractive fruits are large and of uniform size, with beautiful green skin deeply blushed carmine-red. Flesh is white, crisp, sweet and juicy. A good shipper and good canning variety. Hardy, strong grower. For Prices See Top of Page.

NEW COVERT PEAR

Covert is one of the largest of all cultivated pears. It resembles Bartlett in shape with the same roughened surface and has about the same green color which mellow into a clear Bartlett yellow when fully mature. The fruit is about one month later than Bartlett, very firm, and handles unusually well. Canning tests indicate that the canned product is equal to Bartlett and much better than Kieffer. The tree is a cropper. Covert bids fair to replace Kieffer for canning. Heavy 5 to 6 foot trees \$2.65 each. Jumbo trees, \$3.15 each.

The perfect combination spray for fruit trees and berries in the home orchard. Use on Ornamentals, too.

This is generally agreed to be the most effective combination of chemicals in a single spray for use all season long . . . whether you have only one tree or a dozen. WE ARE NURSERYMEN NOT DEALERS

When you order from us you are dealing direct with the grower. We are farmers, honest-to-goodness dirt farmers. We find it a pleasure to improve our methods as we go about our work satisfying our many customers.

It's our business to save you every cent we can on your nursery stock. It is also our business to send you the very best that can be grown. Another part of our business is to see that you are perfectly satisfied. We do not care how many plants you can get for a dollar, if they are not good, healthy, strong plants or if they do not reach you in good growing condition, you have not received your money's worth and you are not going to be satisfied, are you?

It is not the number of plants you get, but the quality of the plants that satisfies. Wouldn't you honestly rather have fewer choice plants for a dollar and be perfectly satisfied than to get more poor quality plants for a dollar and be bitterly disappointed? There's a mighty big difference between perfect satisfaction and bitter disappointment. When it comes to nursery stock, you can buy plants and trees at almost any price, but the stock that will produce the best results is the cheapest you can buy. It is always our aim to produce quality stock at the lowest price possible.

You are welcome to come and see us at any time, you may find us in our overalls pitching in right along with our help, but we will be more than glad to take off time to visit with you and show you around. We have no white collar men or desk engineers, everyone works at Zilke's.

FOR CUSTOMERS WHO LIKE TO CALL AT THE NURSERY

During the shipping and planting season we are open for business 7 days a week, from morning to night. Spring season is from about March 15th to June 1st. Fall planting season is from about September 15th to December 1st, according to the weather conditions.

We also have larger sizes of Shade Trees; heavy transplanted, well branched Crimson King Maples, up to about 15 feet tall, big, well branched transplanted Maple Trees up to about 20 feet tall; heavy well branched pure white Birch Trees up to about 20 feet tall; also many other Trees, Shrubs, Evergreens and Imported Peat Moss for the cash and carry trade (these are too large to ship). This stock will be packed while you wait, same will be prepared so you can haul it on your car.

We are located directly $\frac{1}{4}$ mile west of Baroda, which is about 9 miles south of St. Joseph, on Cleveland Avenue. Watch for our sign on U. S. 12 Highway, 2 miles North of Bridgman or about 9 miles South of St. Joseph.

WE PAY THE POSTAGE ON MANY ITEMS LISTED IN THIS BOOK AND THEY ARE SO MARKED

Please notice that we pay the postage on many items listed in our 1956 spring catalog, and they are so listed. This saves you money.

There are, however, some items that are rather large to ship by prepaid parcel post, such as shade trees and fruit trees. There are some items such as hedge plants, and some varieties and quantities of berry plants that are listed at such low price for our high quality of stock that we cannot afford to pay the shipping charges. FOR ITEMS THAT ARE NOT LISTED AS PREPAID SEE PAGE 50 FOR BEST METHOD OF SHIPMENT.

In some orders there are trees which must go by express, and also stock which would ordinarily go by prepaid parcel post. In order to avoid making two separate shipments, we send the entire order by express. For this privilege we include extra stock which has a greater value than the amount of the extra transportation charges. When we select this extra stock for you, we will choose items that will fit in with your other items.

SHOP BY MAIL DIRECT FROM THE GROWER

You can make your selections in the comfort of your own home from this complete, fully illustrated nursery catalog — this catalog offers you a complete, inexpensive nursery department store as close as your mail box. There is no risk in mail order buying because you are protected by our written guarantee. Order now and save.

As this is our only salesman, we again take pleasure in coming to you with this small catalog of big nursery bargains. We again offer you the highest quality hardy northern grown stock at wholesale prices. Through these annual catalogs and your business with us we feel acquainted with you. Whether your order is for \$1.00 or \$50.00 it will receive our personal attention and you will get a square deal.

You probably will receive a great number of catalogs this spring, listing many varieties of fruit of every description, but just remember that the Zilke Nursery is offering only the best of each class, the kinds that produce the most and best crops or fruits, that thrive and show the most natural disease resistance. Every plant, tree, shrub, and bulb that we offer is State inspected and free from disease.

Varieties are an important consideration in planning either your fruit garden or your ornamental planting. Some of the old varieties are still in first rank, but many must give up their places to the newer and finer kinds. We urge you to give the new 20th Century Strawberry, Everbearing Durham and Black Magic Raspberries, Giant Red Grape and Paper Shelled Carpathian English Walnut a fair trial. We feel sure you will be more than pleased with the results.

Here at the Zilke Nursery we utilize every known scientific method of selection, breeding, production and protection in shipment that will insure your getting perfect plants in perfect condition, with strong, fibrous roots for quick, sure growth.

It will be our constant study in the future, as it has been in the past, to give perfect satisfaction to our old customers as well as our new ones who entrust their order with us. Our success, we feel confident, depends wholly on the satisfaction we may be able to give our customer friends.

The Zilke Guarantee of Satisfaction

We guarantee all plants and trees sold by us to be State Inspected and apparently free from disease and insect pests. We also guarantee them true-to-name, and will replace, free of charge any that may prove otherwise through possible error.

Rudolph H. Zilke, Jr.

We guarantee all plants, trees, shrubs, bulbs and seeds to reach you in good growing condition or will replace any stock that arrives in poor condition, if we are notified within five days after you receive the shipment. It is mutually agreed between ourselves and the customers that we shall not be liable for more than the original purchase price.

We will replace any stock at one-half of the catalog price that does not live the first season, if you think it was the fault of the stock in any way, providing the complaint is received before July 1st of the year planted. It is impossible for us to consider any claim made after July 1st.

DWARF FRUIT TREES

DWARF FRUIT TREES BEAR FULL SIZE FRUIT

The Dwarf Fruit Trees are especially adapted to the city or suburban home, where large-spreading standard size fruit trees are not wanted. They may be worked into the landscape planting wherever you would like to use a flowering tree, or they may be planted in the lawn. These are the true dwarf trees that you have been reading about in the leading magazines. Trees are budded on special roots so that they will never grow very large or tall. They are extremely decorative, especially at spring blooming time, can be pruned to desired height and shape. A beautiful sight in the spring, when aglow with blooms. These trees are dwarf in size only, they will bear full size fruit in great abundance.

DWARF APPLE TREES

Heavy 2 year trees, 3 to 4 foot, \$3.00 each; 3 for \$8.25.

Extra heavy 3 year trees, 4 to 5 foot, \$4.00 each; 3 for \$11.25

RED JONATHAN—Bright, solid red. Flesh white, sometimes tinted with red; firm, crisp and tender—a splendid family sort and highly profitable for market.

DOUBLE RED DELICIOUS—The fruits are large, flesh fine grained, crisp, juicy, melting and really delicious. Tree hardy and a vigorous grower.

YELLOW DELICIOUS—Very best yellow apple. Waxy golden color. Luscious flavor, finest in the world. Bears fruit very young.

YELLOW TRANSPARENT—One of the very best early, yellow apples.

DWARF OKA CHERRY

The flesh color is a rich, intense purplish black red. It is in all a very remarkable fruit to look at and surely a delight to eat. Jelly and jam made from Oka Cherries are as deliciously sweet as they are beautiful to look at. The Oka tree has a dwarf bushy habit and bears from the ground up.

Dwarf Oka Cherry

But the dwarf size in no way indicates the size of the crop of cherries, for the strength of the plant goes into fruit production and not into surplus tree growth, and so consequently the limbs and branches burden themselves with fruit. Plant 2 trees for perfect pollination. 2 year Trees, 3 to 4 foot, \$1.85 each; 2 for \$3.50.

DWARF BUSH CHERRY

Shapely, ornamental shrub, with long pointed gray-green leaves, silvery beneath. Covered with snow-white flowers in Spring. Cherries are in large clusters, easy to pick. Makes excellent jelly, jam and juice. The bushes reach a height of four to five feet and are perfectly hardy everywhere. You will find them beautiful and enjoyable. Bearing age plants \$1.25 each; 2 for \$2.00; 5 for \$4.00.

DWARF PLUMS

DWARF STANLEY PRUNE—This tree is also grown on a special dwarf, hardy rootstock. Seldom grows more than 6 to 8 feet tall. Bears young, very hardy. Fruits are large, bluish purple, very sweet, rich and fine. Excellent to eat fresh and best for canning. Hansen Apricot

NEW HANSEN APRICOT THE SUPER HARDY APRICOT

Hansen's new sensational Northwest hardy apricot. Recently introduced by Prof. N. E. Hansen, of South Dakota State College, who has been working for many years to produce hardy apricots that would be good eating and large size and still would withstand the rigors of Dakota's cold and drought. Two very important points of interest stand out in regard to these new apricots. One is that they are perhaps one of the most drought resistant of all trees, coming through the terrible droughts of 1933, 1934, and 1935 with flying colors—full foliage and no apparent effect whatever from the dry, hot weather, and with a great crop of fruit. The second point is that they are hardy almost anywhere in America, standing and bearing well in climates getting as low as 50 and 60 below zero. Prices: 2 to 3 foot trees \$1.15 each; 3 to 4 foot trees \$1.65 each; 2 for \$3.15; 4 to 5 foot trees \$1.85 each; 2 for \$3.60.

DWARF ORANGE QUINCE

Sometimes called Apple Quince. Fruit large, round with a short neck; color bright yellow; flesh tender, juicy and of excellent flavor. Highly regarded for jellies and preserves. Trees bear young. Persimmon

PERSIMMON TREES

Heavy transplanted 2 to 3 foot \$1.65 each; 2 for \$3.15;

extra heavy 3 to 4 foot \$2.15 each.

DWARF EVERBEARING FIG Grow Your Own Large Sweet Figs

The fig is large, straw colored thin skin, yellowish pink meat, finest flavor, sweet, prolific. The skin rarely ever cracks. Ripens fruit over a long season, starting in August and still bearing heavy in October. If your temperature does not go much below zero in winter then cut fig limbs back to 10 inches high and cover remaining stubs with about 8 inches of dirt, a few leaves or straw will also help. Do this in the fall before frosts, remove protection in the spring after danger of frost is over. The fig plants grow very rapidly after protection is removed, often growing to a height of 7 feet in one season. The fruit is produced on the 1 year wood. Heavy well rooted 2 to 3 foot \$1.25 each; 2 for \$2.45; 5 for \$6.00.

Everbearing Fig

The tree is a heavy and constant bearer and commences to bear at an early age. The chocolate-colored fruit is one to two inches long. FAMOUS HARDY CORSAN STRAIN

This Hardy tree is growing in many parts of the world; the hardiest is found in Russia, Poland and Northern Carpathian mountains where the winter temperature at times drops to more than 40 degrees below zero.

ZILKE'S NEW RED EVERBEARING RHUBARB

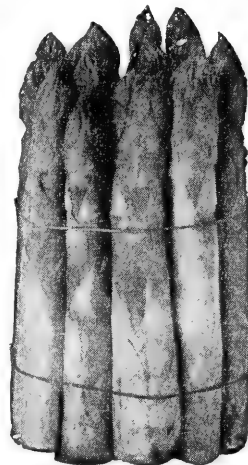

McDonald Rhubarb

ZILKE'S EVERBEARING McDONALD RED RHUBARB—is the finest of all Rhubarb. The stalks are giant in size, twice as large as ordinary Rhubarb. Bright red color. Very tender and stays tender a long time. It has the richest flavor and also more sugar, therefore requires less sweetening when cooked. It makes the finest Rhubarb pies and sauce you ever tasted. The skin is a bright red, but the inside flesh is white, so when the sauce is cooked it has just enough tinge of red to make it look appetizing. It is a tremendous yielder, that is why we call it everbearing, because as fast as you pull one stalk another comes up to take its place. You can use it over a much longer period of time than ordinary Rhubarb. The stalks are 18 to 24 inches long, many half as thick as your wrist. Nothing you can plant in your garden will give you more returns than McDonald Rhubarb. We recommend it very highly, not only because it is healthful, but because it tastes so good. Lasts a life time. Heavy 2 year divisions, 75¢ each; 3 for \$1.89; 10 for \$5.50.

SAGE — A perennial herb that is indispensable for seasoning meats and poultry stuffing, sausage, etc. Plants are hardy and will grow for years without replanting. 2 year plants, 35¢ each; 3 for 90¢, Postpaid; 6 for \$1.50, Postpaid.

New Paradise Asparagus

**MATURES A YEAR EARLIER—PLANT THIS SPRING
HARVEST FIRST CROP NEXT YEAR!**

For this year we offer this wonderful new variety from the market gardens of California—where only the best is grown. Again we predict that within a very short time Paradise will have supplanted all other kinds, and will be the standard market and commercial variety in all sections. It is similar in appearance to Mary Washington, and was developed as a sport of that variety by an Asparagus grower in Southern California. Stems are large, same color as Mary Washington.

The opportunities for a quick profit from Paradise are now greater than ever before. With America calling for increased production of all food stuffs, canners are demanding greater and greater supplies. Paradise fully meets their requirements, being especially suitable for both canning and freezing under new process.

20TH CENTURY

A new everbearing strawberry that has both eye and taste appeal, plus being a top producer of big red, honeysweet berries of excellent quality.

Never has a strawberry become so popular as quickly as 20th Century. The reasons are simply that it produces so heavily big red berries of fine flavor.

The rich sweet flavor is of the best—really honeysweet, retains this delightful flavor when frozen. A berry of superior quality for freezing, jams and jellies.

Plus being a top producer, it starts bearing in 60 days after planting and continues until frost stops it in the fall. NEW RED RICH EVERBEARING STRAWBERRY

SO NEW—SO EXCITING—SO DIFFERENT that it flashed into headlines of thousands of newspapers across the land . . . that's RED RICH, the new berry . . . the strawberry that's got everything.

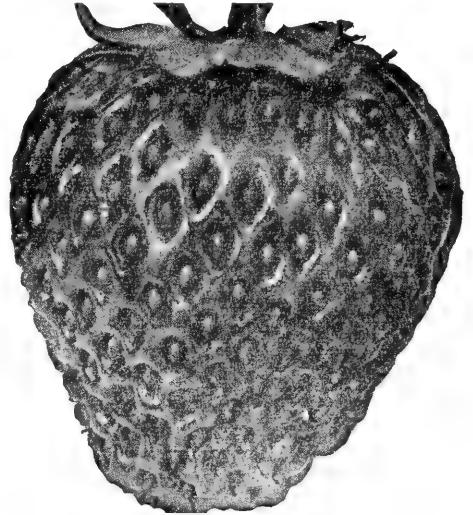

RED RICH UNSURPASSED FOR FREEZING

Unsurpassed for freezing, RED RICH is a deep red clear through. It possesses an abundance of natural sugar—less of yours for preparation. Solid and firm, RED RICH holds its natural eye appealing qualities when thawed—it won't mush up. Too, it makes a better dessert or preserve because it is big and red and sweet.

Even in its earlier development a one acre planting of RED RICH yielded 4,000 quarts the same season it was planted. And in a second year RED RICH produced a June crop in matted rows from June 6 to July 6, like a June bearer, and then came through with a heavy yield in August, September and October to more than double the first year's crop. The crown and root system are exceptionally large as well as the leaves. It is a rugged, disease resisting plant that will produce outstanding yields.

The Thornless is as hardy, rugged and heavy bearing as its parent the Boysenberry. Vines grow long, and this pretty apple-green vine loaded with giant purple beauties is a sight you will never forget, and after you taste a handful of them, other berries will go begging for a while. EVERBEARING BLACKBERRIES

But have you ever heard of EVERBEARING BLACK RASPBERRIES? Well it's here now, ZILKE'S HAVE IT, and it's really a BEAUTY.

The "Black Magic" Everbearing Raspberry ripens early, it starts to ripen with the well known Early Logan variety. After the summer crop is picked, Black Magic begins producing on the tips of the new canes and side branches, Black Magic not only has fruit on the tips of the new wood, it develops side branches, which are also helps in extending the fruiting season. Black Magic starts with the earliest black raspberry and from there on in until fall or freezing weather it has ripe berries, green berries and blossoms all at the same time.

BLACK MAGIC IS VERY HARDY

This new Black raspberry was found in the high altitude of West Virginia. Its origin at this high altitude would assure its being winter hardy and capable of thriving throughout the northern part of our country. We have fruited Black Magic in the state of Michigan for the last seven years, without winter injury to the plant or the crop.

BERRIES ARE GOOD IN SIZE AND QUALITY

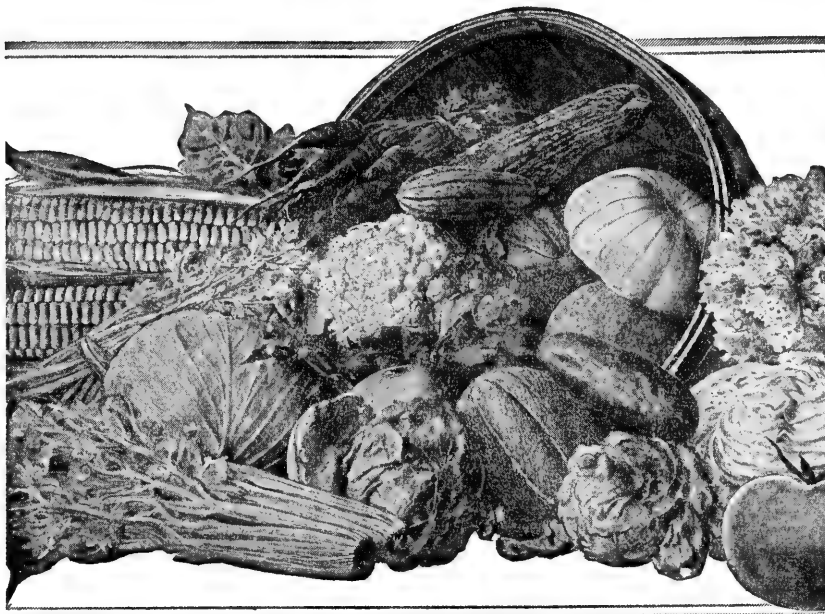

The summer crop of berries are about the size of Cumberland, the fall or everbearing crop is larger than Cumberland or Logan. The canes are very vigorous and productive. Most of the berries are about $\frac{3}{4}$ of an inch in diameter when ripe. The fall crop is larger in size than the summer crop. With this latest addition to the Iris family, it is now possible for everyone to have flowers growing in their own gardens, so like the expensive orchids. Long slender stems bear as many as twelve to fifteen superbly beautiful flowers on each plant, all at one time, hundreds before the season is over.

The flowers of the new Shilka are delicately fragrant, a remarkable attribute to an already beautiful flower. Many of the blossoms come double.

FAST GROWING, LONG LIVED

America's Great New Shade Tree

The MORaine LOCUST is a round headed tree when young but tall and vase-shaped when older. Mature trees attain a height of 80 to 100 feet with lower branches high enough to clear a two story house. This feature permits planting the tree closer to the house than is the case with most other trees. The "Miracle Plant Food" Ra-Pid-Gro

A complete, quickly available, easily prepared plant food by merely adding one pound of RA-PID-GRO to 22 gallons of water

WHAT IS A RA-PID-GRO?

RA-PID-GRO is a complete concentrated plant food formula. Easily made into an immediately effective liquid fertilizer by simply adding water. It will speed up growth of plants now in place and will assure more successful transplanting of new plants.

HOW IS IT USED?

RA-PID-GRO is so easily prepared for use. Just add water at the rate of 1 lb. of RA-PID-GRO to 22 gallons of water. Allow to dissolve and it's ready for use. Apply around each plant according to directions on the bag. For use on small numbers of plants mix at the rate of a teaspoonful to the quart of water. Also very valuable for use when transplanting. Dip plants in solution for 3 or 4 minutes, then set in place and water with remainder of liquid. Practically eliminates losses.

WHAT WILL IT DO?

RA-PID-GRO will work almost unbelievable miracles in promoting rapid and healthy growth on all types of plants. Use it on lawns, around shade trees, evergreens, shrubs, roses, perennials, vegetables and house plants. Many times plants which have been given up for dead will respond to applications of RA-PID-GRO. All the vital plant food elements are present in this remarkable discovery and since it is applied in liquid form, are readily available to the roots of the plant.

HOW DOES ITS COST COMPARE WITH OTHER FERTILIZERS?

RA-PID-GRO is less expensive than other fertilizers. In the larger quantities it makes your fertilizer cost about ½ cent per pound as against a cost of about 3 cents per pound for average fertilizers. Remember, 1 pound of RA-PID-GRO makes 176 pounds of rich and complete plant food.
